How the book works

The appropriate button combination is detailed next to each move, with some moves having more than one possible combination, ie. - Shoulderbreaker: left **or** right, kick.

The damage points for each outrageous move are shown in red parenthesis next to the move's name, ie. - Awesome Bomb (8). Each wrestler's devastating finisher is also displayed in red.

Now that you have the info and you know the tricks of the trade, the question remains… Are you extreme enough to get the job done?
